

NORTHROP GRUMMAN

DEFINING THE FUTURE™

©2008 Northrop Grumman Corporation

Leveraging every sensor
to guide every shooter.

IBCS. Northrop Grumman is committed to helping the Army realize its vision of net-centric air and missile defense at an affordable cost. Our dominance in BMC2 includes Army air defense systems, such as C-RAM, ADAM, and AMDWS. Our extensive experience with the Army gives us insight into Battle Command requirements. Our IBCS approach provides the warfighter with actionable information through integration of the best tools and data available. Warfighters will enjoy the advantage of full situational understanding and the tools to match defense assets to threats. So the answer to all air and missile challenges will be, they shall not pass.
