

Thomas W. Shelman

Vice President and General Manager
Civil Systems Division
Northrop Grumman Information Systems

Thomas W. Shelman is vice president and general manager of the Civil Systems division of Northrop Grumman's Information Systems sector. The division focuses on serving the public sector mission and customers with systems and services.

Mr. Shelman most recently served as vice president and general manager of Northrop Grumman Information Technology's Enterprise Applications business group, which concentrated on system integration, systems and software development, identity management, health and human services IT solutions, human capital management solutions, and applications development across our customer base, focusing on discriminating enterprise-level solutions, applications and processes that enable customers to operate more efficiently and effectively.

Previously, Mr. Shelman was president of Northrop Grumman IT's Defense group, a business responsible for providing information technology and related services to the Department of Defense. The Defense group focuses on systems and services related to analysis, training, communications, IT infrastructure, logistics, mission support, computer simulation, and science and technology.

Mr. Shelman was vice president and chief information officer of Northrop Grumman Corporation, prior to moving to the IT sector. In this role, he led Northrop Grumman's IT strategy as the corporation grew into a \$30 billion operation. He standardized the systems infrastructure and consolidated systems to support the corporation's acquisition and integration activities. His successful execution of an integrated IT shared services model greatly reduced recurring IT costs for Northrop Grumman as a percentage of sales over time. Mr. Shelman also led several consecutive enterprise implementations, including a secure network and enterprise office collaboration. His financial accountability represented more than \$1 billion in IT assets, processes and personnel.

In addition to corporate responsibilities, Mr. Shelman was chairman of the e-Business Steering Group of the Aerospace Industries Association from 2001 to 2003. Mr. Shelman is an active member of the Federal Government Leadership Forum, which is working to improve information sharing between the public and private sectors to protect our country from terrorist threats.

Through Mr. Shelman's leadership, Northrop Grumman received *CIO* magazine's CIO 100 Award in 1997, 2002, 2003 and 2004. The company was named to the *InformationWeek* 500 for seven consecutive years, and also appeared in that publication's Top 100 Innovators list in 2005. Mr. Shelman was distinguished as Information Systems Executive of the Year for 2003 by the David D. Lattanze Center at Loyola College, Baltimore, a nationally recognized center of excellence dedicated to management collaboration and excellence in business and IT. In 2004, Mr. Shelman was selected as a *Computerworld* Premier 100 IT Leader and his Litton Industries integration initiative was among *Computerworld's* 12 Best in Class. He received the American Business Award for *Best Management Information Systems/IT Executive* in 2006. Mr. Shelman serves on several business advisory boards that span the industry. He is a graduate of Texas A&M University, Commerce.
