▼ **FAA**

For over 50 years, at every level, our national airspace system has relied on the technology and expertise of Northrop Grumman to get travelers where they need to go, safely and efficiently. Working directly with the FAA, we have been instrumental in developing system advancements across the board. And only Northrop Grumman has the disciplined approach to life-cycle engineering that will deliver the performance the next generation of systems will require. Northrop Grumman. A trusted advisor. Ready to partner with the FAA today for a safer tomorrow.
