21st Century Solutions for a Safe, Resilient World

Complex dangers – both natural and man-made – threaten America’s homeland. The security and resiliency of the Nation depend on its ability to prevent, mitigate and swiftly respond to diverse risks. The integrated systems and technologies needed to achieve these goals are within reach today. Northrop Grumman is leading the way.

Northrop Grumman designs and builds end-to-end solutions that are secure, scalable, cost effective, and reliable. These diversified solutions mitigate risk and secure land, air, space, sea and cyberspace. Agencies throughout government, and in the private sector, rely on our proven experience, diverse expertise and innovative thinking to meet current homeland security requirements and to anticipate and manage emerging crises. We improve mission and organizational effectiveness, reliability and efficiency, and security and resiliency. Dangers will always be with us. Northrop Grumman plays a central role in ensuring that America and other nations worldwide are prepared and their people are safe.

Covering the Security Spectrum

Northrop Grumman’s industry-leading solutions encompass:

- Air and space security
- Border management
- Chemical and biological detection
- Coastal surveillance
- Critical infrastructure protection

- Cybersecurity
- Emergency preparedness and response
- Identity management and privacy protection
- Infrared, laser and microwave countermeasures
- Infrastructure management
- Integrated emergency command centers
- Interoperable, secure wireless and broadband communications
- Maritime domain awareness
- Navigation and weather radar systems
- Public health and medical preparedness
- Public safety systems
- Situational awareness through intelligence and surveillance

- Supply chain and cargo screening
- Threat management
- Training and exercise support

Experience Proven on Major Initiatives

One of the world’s premier systems integrators, Northrop Grumman has supported major security initiatives for over 40 years. Our global solutions and domain expertise help secure borders and ports of entry... safeguard national infrastructure and assets... coordinate emergency preparedness and response... provide needed secure communications and cybersecurity... and assist first responders in public safety operations across the country and in other parts of the world.

Serving many of today's most important homeland security programs, we partner with the U.S. Department of Homeland Security (DHS), the U.S. Department of Defense (DoD), with hundreds of civil federal, state, local and commercial customers, with international governments, and with key suppliers and teammates. Together, we are making the world safer and better prepared for what the future may bring.

Strength Through a Layered Approach

Cybersecurity, information-sharing, and wise application of technology are critical to homeland security. Effective prevention, response, and recovery require interoperable approaches based on a sophisticated mix of approaches and solutions.

At Northrop Grumman, we combine industry-leading resources with the expertise in information systems, electronic systems, aerospace systems, and technical services. Our specialists look at the big picture to develop practical, broad-based solutions, which integrate "layers"

of technologies, business processes, people, training, policies and regulations, and legacy "stove-piped" systems to resolve problems and address risks. We lower risk and improve interoperability by leveraging the broad range of our offerings across multiple homeland security clients. We combine strong mission focus with agile development, resulting in successful homeland security programs and solutions for our diversified customer base.

This powerful approach enables our customers to enlist a wide range of interconnected strengths, resources, systems, and solutions to address any challenge. It also enables them to address unique needs and situations. Our customers operate within complex frameworks of budget and regulatory constraints, policy requirements and political settings. Addressing these challenges demands creative solutions, the kind that a broad, interoperable systems design delivers. At Northrop Grumman, this integrated approach to homeland security is part of our fabric and our future.

A Sure Vision for the Road Ahead

Northrop Grumman has committed itself to advancing the course of homeland security. We help counter today's threats. But we're also focused on the future – anticipating the security risks that will affect us and other nations around the world... thinking through tough problems... and investing in innovation and new strategies to help ensure continuing security, preparedness and resilience.

Find Out More

Northrop Grumman is a leading global security company whose 75,000 employees provide innovative systems, products and solutions in aerospace, electronics, information systems, and technical services to government and commercial customers worldwide.
